

NETSURE PARTNERS UP WITH WOLLIES

“finding a higher purpose by making giving part of what Netsure does every day”

Netsure, bringing purpose and meaning though giving

Netsure Financial Group and Wollies Animal Shelter are proud to announce that we have entered into a worthy and charitable partnership! We are excited to work together to assist abandoned and less fortunate animals in our surrounding communities

Wollies comes from humble beginnings. The initial purpose at Wollies was to sterilize as many animals as possible, way back in 2003.

However, it did not end with this sterilization project. Wollies became more and more involved, helping abandoned, neglected and abused animals. Before they knew it, Wollies had evolved in to a full-scale operation which is known today as WOLLIES ANIMAL SHELTER.

Netsure Financial Group which was borne out of a desire to build an innovative, service-orientated organisation that provides reputable financial planning solutions to our customers, wanted to bring purpose and meaning to our business and our clients through giving back, we are committed to achieve more social impact by embedding this into our everyday business operations and creating a unique giving story with Wollies Animal Shelter and finding a higher purpose by making giving part of what Netsure does every day.

Netsure is delighted to announce that we will be giving back to our Furry Four-Legged Friends... By supporting the Wollies Animal Shelter and donating 100% of fees received on policy inception for every short-term insurance policy taken up with us.

Netsure aligns its self to the Wollies Promise that these animals is that they will NEVER go hungry again, they will NEVER be abused, and that they will ALWAYS have warm beds to sleep on and all the love and attention they so rightly deserve.
